FULL HOLOGRAM PATCH – 1.0MIL
GENERIC GLOBE DESIGN

Technical data & Specification

The R4251 ribbon allows the application of a hologram (an optical variable design) on card in a form of a transparent layer.
Thanks to this ribbon, you add security to your cards. A hologram is not possible to duplicates and simplifies the examination process.
The hologram applied is the following one (Generic Globe Design):

General Specification

- **Type:** Security ribbon
- **Description:** Full Generic Hologram Patch – Generic Globe Design.
- **Features:** This holographic ribbon is composed by clear PET patches with a random holographic OVD micro structure. Its composition allows a good resistance, a protection from exposure to water, an enhanced chemical resistance and an excellent adhesion on card surface.
  This hologram is a generic one. Evolis gives you a turnkey solution to protect your cards and your information. The holographic artwork is already created, composed by security features, ready to be used.
- **Storage Information:** It is recommended that this product is used within one year. Avoid dust, direct sunlight, high humidity and high temperatures. Do not place near solvent or other chemicals.

Compatibility and printing capacity

- **P/N R4251:** Securion. Up to 200 prints per roll.

Advantages

Your cards are protected against forgeries and falsification.
Tested and validated by Evolis R&D and Quality departments, these consumables bring you printing quality and reliability.
Use Evolis High Trust® ribbons to keep off defects and to benefit from high-quality printouts and at an optimal cost-per-card.

Evolis card printers + Evolis High Trust® consumables = the winning combination!
